Professional Summary

Full-Stack Architect & Engineering Team Lead with 4+ years of experience designing and developing scalable web, mobile, backend, and cloud systems. Proven expertise in enterprise software, including ERP, accounting platforms, ASP.NET Core, C#, Next.js, React, Python, Flutter, SQL Server, AWS, GCP, and Docker. Experienced in system architecture, microservices, AI integrations, Agile leadership, code reviews, and developer mentorship.

Work Experience

TEAM LEAD & FULL-STACK DEVELOPER

Silicon Computer Systems — Apr 2023 – Present

- Lead engineering teams through Agile/Scrum development, coordinating sprint planning, estimation, technical execution, code reviews, and delivery.
- Architect and develop scalable web platforms and high-performance REST APIs using ASP.NET Core, C#, Next.js, React, SQL Server, and MySQL.
- Design software architectures that translate business requirements into maintainable, scalable, and production-ready systems.
- Develop Python AI agents and Flask microservices for workflow automation, data processing, and intelligent backend operations.
- Design and manage containerized deployments and CI/CD workflows across **AWS, GCP, Docker, and Windows Server** environments.
- Lead cross-platform mobile development using **React Native and Android Studio**, maintaining performance and UI/UX standards.
- Conduct peer code reviews, establish development standards, troubleshoot complex technical issues, and mentor developers.
- Architected and maintained enterprise software solutions including ERP systems, manufacturing and production workflows, stock management, payroll systems, and AI-powered accounting platforms (QuantaBooks).

FULL-STACK & MOBILE DEVELOPER

RAION DIGITAL — May 2022 – Apr 2023

- Developed responsive web applications using React, JavaScript, HTML5, CSS3, Tailwind CSS, and Bootstrap.
- Built backend services and dynamic applications using PHP, Laravel, MySQL, and REST APIs.
- Engineered cross-platform mobile applications using Flutter and Dart, integrating APIs, authentication, and offline state management.
- Designed reusable frontend components and application structures focused on performance, maintainability, and responsive UX.
- Collaborated across frontend, backend, database, and mobile development to deliver complete software solutions.

FREELANCE AI & SYSTEMS ENGINEER

Self-Employed | Remote | Jan 2023 – Present

- Architected an automated Telegram AI coaching assistant using Python, Speech-to-Text, and Google Drive APIs.
- Developed automated workflows for transcription, summarization, data processing, and cloud-based session archiving.
- Designed the solution as a low-overhead automation system integrating external APIs and AI services.

Academic History

Lebanese University | 2021 - 2024

Bachelor of Arts (B.A.) in Archaeology

InOut Academy 2024 - 2025

NLP Coach

Time line therapy, NLP coach, Hypnosis

Skills

- **Leadership:** Engineering Team Leadership, Agile/Scrum, Sprint Planning, Technical Planning, Code Reviews, Developer Mentorship.
- **AI Engineering:** Python AI Agents, LLM Integrations, AI Automation & Microservices, Local AI Agent Frameworks, Telegram Bot Development.
- **Cloud & DevOps:** AWS (S3, CloudFront), GCP (Cloud Run), Docker, CI/CD, Windows Server.
- **Mobile & Game Development:** React Native, Android Studio, Flutter, Dart, Unity Engine
- **Frontend:** Next.js, React, TypeScript, JavaScript, HTML5, CSS3, Sass, Tailwind CSS, AJAX, Bootstrap, XML.
- **Backend:** C#, ASP.NET Core, Entity Framework, Node.js, Python, Flask, PHP, Laravel, REST APIs, System Integration.
- **Architecture:** Software Architecture, System Design, Microservices, RESTful APIs, Distributed Systems, Design Patterns, System Integration, Offline-First Architecture, Scalability & Performance.
- **Databases:** Microsoft SQL Server, MySQL, Firebase, Database Design & Data Persistence.
- **Enterprise & Business Systems:** ERP Systems (eQualPro ERP), Manufacturing & Production Systems, E-Commerce Platforms, Stock & Inventory Management Systems, Payroll Systems, AI-Powered Accounting Systems (QuantaBooks), CRM Systems, License Management, Windows Services
- **IT Support & Infrastructure:** Networking (LAN/WAN, Routing/Switching), Domain Management (Active Directory, DNS, DHCP), Backup & Disaster Recovery, Hardware Troubleshooting & Diagnostics.
- **Multimedia & Design:** Blender, 3D Modeling & Texturing, Character/Object Animation, Video Editing, Motion Graphics, Asset Pipeline Optimization
